aditya14.lande@gmail.com
Pune, India

SUMMARY

Full Stack Software Engineer with 3+ years of experience developing web applications and RESTful services using Java, Spring Boot, React.js, JavaScript & MySQL. Strong experience across frontend development, backend services, API integration, database design, authentication, and application security. Seeking a Senior Full Stack Engineer role building scalable web products.

SKILLS

- **Languages: Java, JavaScript, SQL**
- **Backend: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, REST APIs, Microservices Architecture**
- **Frontend: React.js, Redux, React Hooks, HTML, CSS, Bootstrap**
- **Databases: MySQL**
- **Security: JWT, RBAC**
- **Testing: JUnit, Mockito, Postman (API Testing)**
- **AI Tools: Claude, ChatGPT, GitHub Copilot (AI-assisted development, code generation, debugging, code review, test-case generation)**
- **Build & CI/CD: Maven, Jenkins, CI/CD Pipelines**
- **Cloud & DevOps: AWS, Docker, Kubernetes, Amazon EKS, Terraform**
- **Version Control: Git, GitHub**
- **Code Quality & Monitoring: SonarQube, Prometheus, Grafana, Datadog, Splunk**
- **Methodology: Agile, Scrum, Jira**
- **IDEs: IntelliJ IDEA, Eclipse, VS Code**

WORK EXPERIENCE

Senior Software Engineer
IBM
Nov 2025 – Present

- **Architect full-stack microservices** in **Java, Spring Boot, React.js & MySQL** for enterprise clients, reducing production defects and improving API reliability.
- Secure role-scoped services by implementing **JWT authentication and RBAC** across **Spring Security** modules, eliminating unauthorized-access incidents.
- Build modular, reusable **React.js components** with **Hooks** and centralized state management, cutting frontend development time.
- Write unit and integration test suites with **JUnit** and **Mockito** for core business logic, lowering post-release regressions.
- Use **AI coding assistants (Claude, GitHub Copilot)** for code generation, review, debugging, and test scaffolding, speeding up feature delivery.

Assistant Consultant
Priacc Innovations
Jul 2025 – Oct 2025

- Automated build, test, and deployment for **Java/Spring Boot microservices** with **Jenkins** and **Maven CI/CD pipelines**, cutting failed deployments.
- Containerized applications with **Docker** and orchestrated deployments on **Kubernetes via Amazon EKS** to support additional concurrent workloads.
- Codified AWS infrastructure with **Terraform (IaC)** and integrated **SonarQube** into **CI/CD**, reducing manual provisioning time and code quality violations.

Associate Software Engineer
Tech Mahindra
Oct 2023 - Jun 2025

- Developed full-stack microservices in **Java, Spring Boot, React.js & MySQL** to support client-facing business workflows.
- Designed and unit-tested **RESTful services** with **JUnit and Mockito**, reducing integration defects.
- Implemented **CRUD operations**, input validation, and exception handling across **MySQL** while driving **Agile/Scrum** ceremonies, improving data integrity.

PROJECTS

Insurance Policy Management System

- Built a **full-stack microservices-based** policy platform; designed **RESTful APIs** and backend services for policy creation, updates, and business rule processing across **MySQL**.
- Integrated React.js frontend components with **Spring Boot REST APIs**; performed **API testing** and validation using **Postman.**

Digital Banking Platform

- Built a digital banking platform covering onboarding, account management, fund transfers, and transaction history using **Spring Boot, Spring MVC & MySQL**.
- **Implemented JWT authentication, Spring Security, and RBAC** to secure financial operations; optimized **REST API and MySQL** queries, reducing average response time.
